Tom Cornebize

Graduate student Theoretical computer science 35 rue des Allobroges 38180 Seyssins – France \$\(^3\) +33(0)6 74 69 59 41 \(\subseteq \) tom.cornebize@ens-lyon.fr \(\frac{1}{2}\) cornebize.net

Education

École Normale Supérieure de Lyon

Master of science in theoretical computer science

École Normale Supérieure de Lyon

Bachelor of science in theoretical computer science, with great honor

Université Joseph Fourier

Undergraduate program in computer science and mathematics

Grenoble, France

May 2015-August 2015

June 2014-July 2014

June 2013-July 2013

2011–2013

Lyon, France

Lyon, France 2013–2014

current

Experience

Research internships.

Bull Grenoble, France

High performance computing: job isolation and distributed optimization of routing. Under the supervision of Matthieu Perotin.

Inria, AOSTE team Sophia-Antipolis, France

Modelisation and verification of concurrent systems.

Under the supervision of Robert de Simone.

- Studied classical models (Büchi automata, Petri nets, temporal logic, synchronous languages).

Verimag laboratory Grenoble, France

Monitoring of distributed systems

Under the supervision of Yliès Falcone.

- Designed an algorithm for decentralized monitoring of distributed systems.

- Implemented a benchmark to obtain experimental results.
- Wrote a report, "Efficient and Generalized Decentralized Monitoring of Regular Languages", published at FORTE 2014.

Laboratoire d'informatique de Grenoble (LIG)

Grenoble, France
June 2012

Monitoring of distributed systems

Under the supervision of Yliès Falcone.

- Performed experimentations to assess the efficiency of an algorithm for decentralized monitoring.
- Proposed several optimizations.

School projects.....

Projet Pensées Profondes

- A modular and open source question answering framework. Team of seven students.
- Developed a question parsing module in Python, with a grammatical approach (Stanford CoreNLP and NLTK libraries).

SAT solver

- Developed a program implementing the DPLL algorithm to solve the SAT problem, in C++ language.
- Added watched literals and clause learning heuristics.
- Added a SMT (satisfiability modulo theories) solver.

Cellular automata, in C. Used MPI.

Simulation of distributed search, in Erlang.

P2P client, in C. Used pthread and socket.

Languages

French: Mother tongue German: Basic

English: Fluent

Computer skills

Programming languages: Python, C, C++, OCaml, Erlang, assembly languages (ARM and MIPS)

Presentation languages: LATEX, Markdown

Distributed systems / parallel programming: MPI, pthread, socket

Miscellaneous: GNU/Linux, Git, unit testing
